

JSC „STROMMEN LT“

QUALITY AND ENVIRONMENTAL PROTECTION POLICY

JSC „STROMMEN LT“ – specializes in the production, design and installation of individual aluminum windows, doors, terrace doors, facade systems. With qualified employees, many years of experience and advanced technologies, we produce products that meet the strictest EU requirements.

Strømmen - is a brand of Scandinavian origin, the history of which dates back to 1884. In 2005, Strømmen production was moved to Lithuania, and in 2015 and 2020, two new factories with a total area of 7,600 square meters were opened.

Goal. To carry out production, organize wholesale and retail trade, provide quality services for profit.

Mission. To produce high quality and added value windows, doors and facades.

Vision. To help the user use less energy for heating and cooling the building, thereby reducing the impact of each person on climate change.

In order to maximally satisfy the needs of customers, to ensure the high quality and environmental friendliness of the services provided, as well as the health and safety of employees, we undertake:

- to follow the legal acts regulating the business branch of the Republic of Lithuania and other requirements that the organization undertakes to fulfil in order to comply with the requirements of the standards ISO 9001:2015, ISO 14001:2015;
- to continuously improve the effectiveness of the quality and environmental protection management system, taking into account performance results, employee suggestions, customer and partner feedback for requirements;
- to promote the improvement of the qualifications of employees;
- to implement innovations and look for solutions to improve the quality of service delivery;
- to constantly improve permanent relations with our partners and suppliers;
- to allocate the necessary resources for the implementation of existing quality and environmental goals and objectives;
- to ensure rational use of natural resources, responsible management of waste;
- to improve the used and introduce new safe technologies that reduce environmental pollution;
- to continuously improve the effectiveness of quality (EN ISO 9001), environmental protection (EN ISO 14001) management systems.
